

Corporate Environmental Safety and Health Manager

The CESHM will be responsible for the overall management of the Corporate Environmental Safety and Health Program (CESHP) and for the effective implementation of the regulatory requirements associated with the CESHP. This will include the effective integration of environmental, safety and health (ES&H) values and initiatives into all phases of project acquisition, design, planning, management and implementation.

ESSENTIAL FUNCTIONS

- Manage, review, and implement the CESHP.
- Write, review and approve Accident Prevention Plans, Site Safety and Health Plans, and Activity Hazard Analysis forms for multi-disciplinary, multi-faceted, environmental remediation, building decontamination and demolition (D&D), and explosive hazard mitigation projects.
- Provide consultation and recommendations to project management personnel during all phases of project execution.
- Conduct near miss, incident, injury, or illness investigations to discover root causes and develop corrective actions.
- Conduct site visits to evaluate site and work hazards prior to bid or plan development.
- Conduct periodic on-site audits of projects to determine their compliance with the CESHP.
- Develop air monitoring and sampling protocols for projects where airborne hazards may be present.
- Coordinate with Human Resources Department regarding training, medical surveillance, drug testing, and recording keeping requirements.

QUALIFICATIONS

- **Board Certified as a Certified Industrial Hygienist (CIH) and/or Certified Safety Professional (CSP) required.**
- Qualified through training and experience to instruct or direct 29 CFR 1910.120 8-hour refresher courses and other OSHA required competent person or hazard specific courses (i.e., lead awareness, confined space, excavation and trenching, etc.).
- Proficient in the following application programs: Microsoft Office 2003 (MS Word, Excel, Outlook, Explorer, PowerPoint). Adobe Acrobat Standard, Photo Editors and Blackberry applications.
- A background with hazard evaluation and mitigation concerning Munitions and Explosives of Concern (MEC), building D&D, hazardous materials management, lead and asbestos abatement, and development of project plans. Experience with US Army , US Navy, and the US Corps of Engineers is essential.

EDUCATION/EXPERIENCE

- Minimum of a Bachelor Degree in Science
- Minimum of five years experience in the management of Corporate Safety and Health programs involving work similar to that discussed above.
- Board Certified as a Certified Industrial Hygienist and/or Certified Safety Professional
